

Zonglong Hydraulic has decades of experience in the production and processing of oil filters and hydraulic valves ,built by the backbone of Shanghai Gaohang Hydraulic Company. Now we have three companies: Shanghai Zonglong Hydraulic Machinery Co., Ltd., Nantong Zonglong Hydraulic Co., Ltd. and Shanghai Zonglong Mechanical and Electrical Equipment Co., Ltd. All of our factory buildings are owned by ourselves. We have set up offices all over the world.

Zonglong Hydraulic has formed a complete oil filter and filter core production line including design, mould development, casting, intelligent production workshop, filter core, plastic spraying, anodic oxidation,finished products, etc., and also has a strong mechanical processing capacity.There is a perfect internal cleanliness system with its own control. The company invested tens of millions to build a 100,000 degree clean workshop for filter element, with a fully automatic filter element producing line imported from German.The company also has established an advanced test center for filtration technology.

Hydraulic valves produced by our company have high-end complete set of equipment. The casting adopts imported formula. The deformation of casting is controlled within 1~2 μ m. And its aging treatment is up to one year.Sealing parts adopt Italian brand FLON,springs are from Sumitomo materials, other accessories all use domestic top brands. The main hole is processed by imported grinding equipment.The cylindricity index of 16 diameter can reach 1 μ m. In addition to using ultrasonic and special equipment, the cleaning process has 8 passes and is equipped with endoscopy to ensure the high quality of products.

Nantong Zonglong Hydraulic Co., Ltd. is a high-tech enterprise(GR201832007087) with 38 patents, and has passed the Environmental impact assessment and Three levels of safety standards, one of only two enterprises freed from annual examination in Nantong area by the rural Commercial Bank in Changshu of Jiangsu.
