

POWER ASCENDER

Used for high-altitude climbing operations and rescue.

Electric lifting, aerial hovering, freeing hands.

- | | | | |
|-------------------------|----------------------|---------|-------------|
| 1、Rope | Semi Static rope | EN1891A | 10.5-11.5mm |
| 2、Safe Working Load | 250KG | | |
| 3、Ascent speed | 0-60m/min(150kg) | | |
| 4、Battery range | 1500m with 75kg load | | |
| 5、Charging time | < 60min | | |
| 6、Ascender weight | 13kg | | |
| 7、Remote Control | 250M | | |
| 8、Water/dust resistance | IP65 | | |
| 9、Temperature range | -20°C ~ +50°C | | |

Double roller, the rope is more wear-resistant. There is lateral movement; The rope pulley is protected by a shield; Manually descend. There is an emergency stop function. Lithium ion high-capacity batteries. Equipped with a power indicator function, the intelligent system controls battery overcharging, overdischarging, and temperature protection; The motor with patented technology has high torque, no noise, and is maintenance free; Waterproof, rainproof, and drop proof.
