Conference Data

“

Themed “Building a Resilient Global Supply Chain and Accelerating the Energy Transition for a Great Future”, CWP2023 lasted for four days and include an opening ceremony, keynote speeches, summit dialogues, innovation theaters, as well as 21 sessions on different topics, such as “Global Wind Power Industry Layout and Supply Chain Security”, “Prospects of Wind Power Technology Development in the Dual Carbon Era”, “Dynamics of the International Wind Power Market and Investment Opportunities” and “Wind Turbine Reliability”. In the context of the “dual carbon” targets, these sessions mainly discussed the international cooperation of the wind power industry chain, the security of the global supply chain, technological innovations for the safety and reliability of wind turbines, and the risk management of offshore wind power.
