

Introduction to Harbin Chongzhi Technology Co., Ltd

In November 2016, Harbin Tongying Mechanical and Electronic Equipment Co., Ltd. (hereinafter referred to as Tongying Electromechanical) initiated and established "Harbin Chongzhi Technology Co., Ltd." (hereinafter referred to as our company). Tongying Electromechanical was founded in 1951, formerly known as "Harbin Electric CNC", and is affiliated with the former central enterprise "Harbin Electric Machinery Factory Co., Ltd. of Harbin Electric Group".

Our company's main business is the development, production, and sales of heavy-duty, insulated, and high protection level rotary encoders. In 2016, we passed the ISO9001 quality management system certification and in 2021, we were awarded the honorary title of "National High tech Enterprise". We have obtained multiple product invention and utility model patents and have a complete independent intellectual property system.

Mainly used in fields such as wind power, steel rolling, lifting, and port machinery. Our company has independent research and development, customized production capabilities, and can provide and solve various encoder usage solutions. The leading design concept determines the uniqueness of our product structure, and the reliability of our products far exceeds that of similar products both domestically and internationally. I have participated in the system transformation design and manufacturing work of large domestic companies multiple times, and have been recognized by users. Provide assistance for the localization of key equipment.
