

SCHAAF Group is an industry benchmark in the fields of precision bolt tightening technology and high torque flange (or shaft) connection technology. Since its establishment in 1977, we have been engaged in long-term development of connection technology, providing high torque flange (or shaft) shear and torsion resistant connection solutions for the wind turbines transmission chain systems, maintenance free bolt connection solutions for tower flanges, and semi-automatic or fully automated bolt tightening solutions. In addition, special connecting components such as hydraulic coupling bolts, TTG nuts, Multiple Stud Nut, hydraulic nut, etc. are industry benchmark products and have been certified by DNV-GL classification society. Many patented technologies lead the market in improving safety, reliability, maintainability, and other aspects throughout the entire wind turbine lifecycle. So far, SCHAAF has established a number of manufacturing bases around the world.
