

Qingdao Lubemater Lubrication Materials Technology Co., Ltd. is a high-tech company founded in 2010 by the high-end equipment lubrication research team. The company is committed to developing high-performance lubricating grease products that are synchronized with the international advanced level for the power transmission system of high-end equipment working in harsh working conditions such as high temperature, low temperature, heavy load, and high speed, and providing domestic lubricating product replacement solutions for high-end equipment in important industries and high-tech industries in my country. More than 200 products of more than ten categories have been developed in many key fields such as continuous flat press hot presses for plates, high-end equipment for metallurgical building materials, large screw air compressors, large wind turbines, rail transportation equipment, large open gears, high-speed precision bearings, power equipment, mining machinery, precision machining, electric tools, and steel rope protection, which have achieved domestic batch replacement of lubricating grease to a certain extent.
