

Victory Technology Company Introduction

Victory Technology (Short for Victory Technology Co., Ltd) stands as a distinguished force in the manufacturing of holding magnets, especially in providing cutting-edge solutions to the wind energy industry. With over a decade of dedicated work and expertise, the company has gained profound insights into the specific requirements of wind energy customers, making them a reliable and trusted partner in the renewable energy sector.

EXPERTISE IN WIND ENERGY HOLDING MAGNETS

Victory Technology has acquired a deep understanding of the unique demands associated with holding magnets in the wind energy sector and the company's relentless efforts are centered around fulfilling these requirements, ensuring their products are optimized for top-notch performance and efficiency in this dynamic field.

UNWAVERING COMMITMENT TO QUALITY

At Victory Technology, quality gained great attention in every aspect of their operations. The company spares no effort to uphold its commitment to excellence. To ensure the utmost reliability and performance of their wind energy holding magnets, Victory Technology has invested extensively in state-of-the-art testing

equipment. Moreover, they collaborate with authoritative third-party labs to conduct rigorous tests simulating challenging working conditions that customers might encounter. This dedication to quality guarantees that their holding magnets withstand harsh environmental conditions and provide long-term stable performance.

WORKING WITH MAJOR INDUSTRY PLAYERS

Victory Technology' s dedication to quality and proficiency has earned them the trust of major players in the wind energy sector. Among their customers are industry giants like GE, SIEMENS, ENERCON, etc. These collaborations stand as a testament to the company' s ability to deliver reliable, high-quality holding magnets, making them a preferred choice for wind energy projects worldwide.

So far Victory Technology' s production facility has earned ISO9001, ISO14001, ISO45001 certifications audited by SGS. Test reports/witness test reports by SGS on anti-corrosion, anti-aging, and magnetic forces are available.

We would be glad to be of some help in promoting efficiency and reducing costs for you.
