Industrial warehousing and after-sales base
- 98%**
Customer satisfaction reached 98%
- Excellent service**
Multiple solutions for free lifetime service

Baier has been deeply engaged in the Chinese market for more than ten years, and has been diligently pursuing the research cause of industrial equipment and practical power technology, to speed up industrial development and help upgrade the industries with scientific and technological innovation as the driving force. Focusing on the research and promotion of fastening, removal and mounting technologies and utility power of large bolts and nuts, the company is committed to promoting the leap forward of industrial equipment and utility power in China and even the world.

The company produces multiple series of products such as electric torque wrenches, pneumatic torque wrenches, servo precision and high-efficiency torque wrenches, hydraulic torque wrenches, nut splitters, hydraulic tensioners, hydraulic pullers, hydraulic jacks, special tools for flanges and hydraulic pumping stations, dedicated to provide high-quality, high-return intelligent solutions for customers around the world.

Over the past decade, BAIER has never stopped exploring and has gradually achieved leapfrog development in wind power, hydropower, thermal power, nuclear power, petrochemical, natural gas, construction machinery, equipment manufacturing, metallurgy, mining, shipping, new energy, railway & subway, bridges, cement and other fields. The company has created a win-win industrial ecosystem together with upstream and downstream enterprises by leveraging its advantages in equipment, technology, platforms and talents, and has joined hands with the industry to create value together.
