

LEIDONG is a high-tech enterprise specializing in the research and development, production, sales, and service of renewable energy hydrogen production and diversified applications of hydrogen energy. The standard setter for fully controlled IGBT hydrogen production power supply; Pioneering high voltage suppression hydrogen power supply solution; The first off grid operation wind solar hydrogen production project hydrogen production power equipment supplier in China.

Our main business includes planning and design of wind solar hydrogen systems, fully controlled IGBT hydrogen production power supplies, hydrogen storage systems, energy management and control systems, etc.
