

English Company profile

Beijing Ruihe Weichuang Holdings Co., Ltd. entered the packaging industry in 2005. Transitioning from traditional packaging to reusable packaging, and from one-time packaging sales to reusable packaging leasing. The company has been consistently pursuing low-carbon, environmentally-friendly innovation development patterns, continuously improving product design, packaging quality and operation service level. In 2018, the company pioneered the use of cascade utilization technology for decommissioned wind turbine blades to develop new reusable packaging materials and products. Currently, the company has established a complete industry chain based on decommissioned wind turbine blades, which includes R&D of recycling equipment, blade processing, circular packaging manufacturing, and reusable packaging box leasing.

Ruihe owns three wholly-owned subsidiaries: Beijing North China Packaging Co., Ltd., Fengnuo (Jiangsu) Environmental Technology Co., Ltd., and Beijing Fengce Technology Co., Ltd. These subsidiaries focus respectively on reusable packaging operation management, decommissioned wind turbine blade recycling and reusable product manufacturing, R&D of resource utilization technologies for decommissioned wind turbine blades. In future years ahead, Ruihe will continually exploring new reusable packaging products and technologies, committed to become a global leader in low-carbon, environmentally friendly and intelligent reusable packaging.
