

The
Rich
North Sea

Clean energy, strong nature

The Rich North Sea started with a dream: A healthy North Sea, source of sustainable energy, rich in nature and bursting with life.

We aim to set a new construction standard for offshore wind farms, creating resilient marine life and options to enhance biodiversity. We hope to inspire action through:

- spreading knowledge
- connecting stakeholders
- anchor nature in policy and legislation

Visit our website to learn more about our work on nature enhancement in offshore wind farms. Or visit the Toolbox if you are ready to start your own projects!
