## About CWP

For over 17 years, CHINA WIND POWER has developed into a landmark exhibition of the renewable energy sector in China market. It is the ideal platform for companies from across the entire renewable energy landscape to showcase their expertise and services to investors and buyers looking to do business in the China market. The main focus is on exhibiting companies from China and abroad who are engaged across the entire value chain to make the energy transition a success. With 100,000+ industry professionals expected to attend over three days of industry innovation, knowledge exchange and new product release, the CWP provides companies the unique opportunity to maximize brand exposure to the right audience. Experience future-oriented technologies and get in touch with relevant decision-makers. China renewable energy market expects attention and investment from overseas markets.

## For Exhibitor

China Wind Power will be held 16-18 October, 2024. The total exhibition area will exceed **100,000** square meters, more than **1000** China and overseas companies will appear in CWP, professional visitors are expected to exceed **100,000**. We will continue to open special exhibition areas. Including offshore wind power, hydrogen storage and energy storage. Innovation drivers from politics and business use this platform to exchange views on current topics and work together on solutions for the energy industry challenges of today and the future.

## For Conference

China Wind Power brings together technical experts from around the world to present and discuss the latest technologies, processes, and innovations to help companies increase efficiencies and save costs. Delegates will hear from over 200 speakers providing access to a wealth of critical industry-leading knowledge and networking. The conference format includes individual technical presentations, panel discussions, round tables, and poster session on the exhibition floor.
